

Rush Expands Cardiovascular Services to Northwest Indiana

Rush interventional cardiologist Hussam Suradi, MD, has opened a new office at 16000 W. 101st Ave. in Dyer to improve access to Rush cardiovascular services in Northwest Indiana. Patients will have easy access to physicians at Rush Center for Structural Heart Disease. Dr. Suradi and his team of specialists offer a full range of treatment options for all types of valve disease in adults, including aortic and mitral valve disorders, as well as adult congenital heart diseases.

Rush Center for Structural Heart Disease

Rush Center for Structural Heart Disease services patients throughout Rush University System for Health. The team includes specialty trained interventional cardiologists, cardiovascular surgeons, cardiac anesthesiologists, research coordinators, advanced practice providers, nurses and clinic coordinators. Approximately 1,500 patients are treated annually. The team is committed to advancing the field of congenital and structural heart disease and is actively involved in clinical research trails. Many of the research trials provide patients with opportunities for treatment when alternative approaches to treatment are limited or not available.

About Hussam Suradi, MD, FACC, FSCAI

Dr. Suradi is an interventional cardiologist specialized in treating patients with complex coronary and peripheral artery disease. He is also fellowship-trained in structural heart interventions skilled in treating patients with heart valve conditions, such as tight or leaky valves, and those who are born with heart defects.

Dr. Suradi uses minimally invasive catheter-based procedures to treat valvular and congenital heart diseases. His clinical expertise includes the list at right.

Dr. Suradi is board certified in adult congenital heart disease, cardiovascular disease and interventional cardiology. He graduated from the University of Jordan Medical School, and completed his residency and fellowships in cardiology and interventional cardiology at Indiana University and congenital and structural interventional cardiology at Rush University Medical Center. He is currently the Director of Structural Hybrid Lab and Co-director of Cardiac Catheterization Labs at Rush University Medical Center.

Clinical Expertise

- Angioplasty
- Aortic coarctation
- Aortic stenosis
- Atrial septal defect
- Coronary artery disease
- Interventional cardiology for congenital and structural heart disease
- Left atrial appendage occlusion (LAAO)
- Mechanical circulatory support
- MitraClip procedure
- Mitral stenosis
- Mitral valve repair
- Paravalvular leak closure
- Patent foramen ovale (PFO)
- Percutaneous valve replacement and repair (aortic, mitral and pulmonic)
- Peripheral vascular disease (PVD)
- Transcatheter aortic valve replacement (TAVR)
- Transcatheter mitral valve replacement (TMVR)
- Transcatheter pulmonic valve replacement
- Transcatheter tricuspid valve repair
- Valvular heart disease
- Ventricular septal defect
- Watchman procedure
