

Rush University System for Health

Lung Cancer Services

Rush's multidisciplinary team of providers work together to provide patients with personalized treatment plans using the latest clinical trials and novel approaches. We understand that time to treatment is important. That is why we make every effort to expedite appointments and connect patients with their care teams as quickly as possible.

Rush is consistently recognized for providing the best possible patient care.

- *U.S. News & World Report* ranked Rush University Medical Center's cancer, pulmonology and lung surgery programs among the best in the nation.
- In 2020, Rush received its fifth Magnet designation, the highest national recognition given for nursing excellence.
- **Rush University Medical Center was ranked number one in the nation for quality in the 2019 Vizient Quality and Accountability Study.**
- The Rush lung cancer program was awarded by the International Association for the Study of Lung Cancer the **Cancer Care Team Award**, which recognizes one program a year for providing the highest quality of patient care.
- **Our thoracic surgeons perform more than 1,000 lung surgeries annually**, with more than 85% of lobectomies performed using minimally invasive techniques as compared to the national average of 50%.
- **Rush received a three-star rating from the Society of Thoracic Surgeons**, a ranking only bestowed to the top 5% of programs in the United States.
- **Rush is a Screening Center of Excellence.** This designation is given to medical facilities that provide responsible, high-quality, low-dose CT screening for early detection of lung cancer and comply with comprehensive standards based on best practices.
